PROFESSIONAL SUMMARY

Enthusiastic BSc IT student with strong skills in full-stack development, Python, and AI/ML. Experienced in building projects ranging from news web apps to finance trackers. Passionate about problem-solving, scalable software solutions, and continuous learning. Open to opportunities in software development and AI-driven applications.

EDUCATION

- B.Sc. IT, M.L. Dahanukar College of Commerce | CGPA: 9.3/10 | June 2023 – Present
- HSC (Science), Sathaye College | 84.17% | June 2021 – April 2023

EXPERIENCE

AI and Machine Learning Intern

Pratnik Infotech

October 2024 - December 2024

Virtual

- Worked on a project using AI/ML to monitor industrial equipment for productivity and efficiency
- Created a dashboard interface to check the equipment's overall health

Young Internship Intern

Scaler School of Technology

May 2024 - July 2024

Virtual

- Built sample no-code websites and portfolio projects
- Explored AI chatbot integration concepts
- Applied networking and personal branding strategies via LinkedIn

PROJECTS

NewsNerd

- A news web app that fetches news objects using API
- Built a React.js-based web app that fetches and displays news using the NewsAPI
- Reduced load time by optimizing API calls and UI rendering
- Implemented category-based news fetching via API parameters for personalization
- Enhanced user interactivity and responsiveness with Bootstrap and JavaScript
- Delivers real-time, categorized news in a clean UI
- Helps users stay updated quickly with tailored news feeds
- Tech Stack: React.js, Bootstrap, NewsAPI, JavaScript

Personal Finance Tracker

- Developed a Tkinter-based expense tracker with MySQL backend
- Features include add, view, sort, filter, and export expenses (CSV)
- Added custom date picker and secure DB handling for reliability
- Simplifies personal expense tracking and financial awareness
- Helps users manage spending and improve budgeting skills
- Tech Stack: Python (Tkinter), MySQL

SKILLS

Languages: JavaScript, Python, Java, C, C++

Frontend: HTML, CSS, React.js, Bootstrap

Backend: Node.js, Express.js

Databases: MongoDB, MySQL, SQL, PostgreSQL

ACHIEVEMENTS

- Led team in Build-A-Thon, delivering project within deadline
